

In case pgAdmin is crushing, do the following:

1. Download the latest version of pgAdmin from <https://www.pgadmin.org/download/>.
2. Delete the folder C:\Users\your_username\AppData\Roaming\pgadmin.
3. Install pgAdmin downloaded at (1).
4. Run pgAdmin from (3) installation (make sure it is this one and not the previous one that came with PostgreSQL).
